PROJECTS

CampusRide: Campus Ride-Sharing Platform

Ongoing

Python, Django, MySQL, Django Channels, Bootstrap, HTML, CSS, JavaScript, Google Maps / OpenStreetMap

- Engineered a ride-sharing platform for verified students and faculty, enforcing 3 role-based access levels (Admin, Driver, Student).
- Integrated live GPS tracking with real-time driver-rider location sync through Django Channels (WebSockets).
- Added 3 safety and communication features: QR-code boarding verification, in-app chat and SOS alerts.
- Created a mobile-friendly interface with Bootstrap and JavaScript, backed by a MySQL database.

Garage Guide: Vehicle Service Booking Platform

Python, Django, MySQL, HTML, CSS, JavaScript, Bootstrap

- Delivered a booking platform linking vehicle owners with certified mechanics for maintenance scheduling and digital payments.
- Structured the application into 3 modules (Admin, Worker, User) covering bookings, service records and customer interactions.
- Styled the front end for desktop and mobile; Django and MySQL handle data and business logic.

Personal Developer Portfolio
